

Wash Brushes Built To Last

2018 EDITION

About Us

Valley Brush Corporation has been manufacturing fine quality wash brushes for the past 25 years.

Our diverse range of 'built to last' wash brushes mainly serve the Recreational and Industrial vehicle, Auto Detail, Janitorial and Reseller Industries in Canada and the US.

Our Guarantee

We stand behind our brushes and guarantee they are the fullest brushes available on the market. Each brush is filled to the maximum thickness with the highest quality fibers in North America, and all of our products are guaranteed against manufacturer defects.

New Products

Every new Valley Brush product introduced into the market is tested in field trials for optimal functionality and optimum application.

Our Vision

To provide the highest quality hand finished wash brushes in North America.

Our Commitment

Valley Brush's commitment to employee safety, product quality, competitive pricing and superior customer service has enabled the success of our dealers and distributors. We will continue to uphold our reputation as a leader in the industry.

Green Line

These brushes are flow-thru

Product Features—

Very soft, dense polybutylene terephthalate polyester, flagged to soft ends, feather tipped.

Heat distortion: 250°F

Fair resistance to acid and diluted acids.

Our most popular brushes for washing vehicles, designed to slide over paint, used by fire departments and auto detailers.

Holds up to a litre of water!

Stock #	Case Qty
214NP-8"	24
214NP-9" - with bumper	20
214NP-10"	24
214NP-14"	14
314NP-Round	24
114NP-Bi Level	12
214NP-18"	15

Bi-Level brush shown. Green Line brushes have extremely dense fibres which hold significantly more water than any other line, reducing labour time and product use.

Bi-Level brushes are angled to maintain surface contact, regardless at what angle you are working.

The 214NP-9" with bumper.

Blue Line

These brushes are flow-thru

Product Features—

Medium soft polystyrene monofilament, flagged to creamy finish for increased fluid retention and cleaning power.

Heat distortion: 175°F

Resistance to acids: good

Excellent resistance to water-based solutions and alcohols.

Utility brushes are very popular with the auto detailers.

The 415-LT9 has been specifically designed for wheels and reaches into all the grooves.

The 215-7" Deck brush is often used for soffit and airplane cleaning and detailing.

The 118 stiff bi-level is great for removing baked on guano from hi-rise windows.

The 315 LT Round Brush is handy for wheels and tight spaces.

Stock #	Case Qty
215-7"LT (Deck Brush)	24
215-8"	24
215-10"	24
215-14"	14
315-LT (Long Trim)	24
415-LT9" Utility (not flow-thru)	24
415-9" Utility (not flow-thru)	24
415-20" Utility (not flow-thru)	12
415-20" L/T (Long Trim)	12
315-Round	24
115-Bi-Level, 2 1/4" long	12
118-Bi-Level, 1 3/4" long, short stiff fibres, not flagged	15

Very thick, dense and soft fibres make these brushes perfect for washing vehicles. 215-10" shown.

Yellow Line

Product Features—

These brushes are flow-thru

Soft polystyrene monofilament, flagged to a creamy finish for increased fluid retention and cleaning power.

Heat distortion: 175°

Fair resistance to acid and diluted acids.

Excellent resistance to water-based solutions and alcohols.

The best **"All Purpose"** brush.

Stock #	Case Qty
212-8"	24
212-10"	24
212-14"	14
212-18"	15
312-Round	24
112-Bi-Level	12

Shown is 10"

With it's thick, fluffy fibres, this is the best "All Purpose Brush"

Red Line

Product Features —

These brushes are flow-thru

Medium soft polystyrene monofilament, flagged to a creamy finish for increased fluid retention and cleaning power.

Heat distortion: 175°F

Resistance to acids: excellent

Excellent resistance to water-based solutions and alcohols.

Our Red Line brushes are most commonly used by cement companies.

The Bi-Level is often used for dumpster cleaning and due to it's excellent reistance to acids including hydrochloric acid, it's also used for graffiti removal.

Stock #	Case Qty
214-8"	24
214-10"	24
214-14"	14
414-9" Utility (not flow-thru)	24
414-20" Utility (not flow-thru)	12
314-Round	24
114-Bi-level	12

Shown is 10"

The ends are flagged to increase fluid retention and cleaning power.

The 9" Utility Brush makes cleaning small areas a snap!

Natural Tampico Line

Product Features—

These brushes are flow-thru

Naturally Resistant to acids.

Easy to clean.

Excellent heat resistance.

Tampico fibre is hollow, so it retains bleach, acids and chemicals, preventing dripping and chemical waste.

9" Tampico is often used to spread rust prevention products on machine parts and to clean checker plating.

Stock

Case Qty

201-8"	24
201-10"	24
401-9" Utility (not flow-thru)	24
301-Round	24
201S-Stack, 4 - 6" in diameter	24
201SL-Stack Large, 8 - 10" in diameter	24
101-Bi-level	12

Stack Brush in use

Stack Brushes are available in 2 sizes, S and L

Grey Line

These brushes are flow-thru

Product Features—

Medium stiff flagged polypropylene with good bend recovery.

Heat distortion: 225°F

Excellent resistance to acids.

The 9" brush is preferred for cleaning plastic such as outside furniture, as it's tough enough to get the dirt out of the grooves but soft enough not to damage.

114P is often used by fish farms to clean the pens.

Stock

Case Qty

214P-8"	24
214P-10"	24
414P-9" Utility, Angled (not flow-thru)	24
414P-20" Utility (not flow-thru)	12
314P-Round	24
114P-Bi-level	12
514P-Counter Duster (not flow-thru)	18

Bi-Level Brushes are best for broad surfaces where maximum contact is required

Counter Duster

The Round Brush is perfect for getting into tight spaces such as siding and wheels

Black Line

Product Features—

These brushes are flow-thru

Stiff Polypropylene.
Heat distortion: 250°F.
Very good resistance to acids.
Popular at hardware stores.
The 20" utility is often referred to as the "Boot Brush" – it allows you to reach the bottom of your boot and remove dirt without bending.

Stock #	Case Qty
222-8"	24
222-10"	24
422-9" Utility (not flow-thru)	24
422-20" Utility (not flow-thru)	12
322-Round	24
122-Bi-level	12

The Bi-level profile

8" & 10" heads

Stiff Crimped Polypropylene Line

These brushes are flow-thru

Product Features—

Very stiff polypropylene fibres in natural colour.
This line is for aggressive applications such as paint removal, deck and driveway scrubbing, cleaning butcher blocks, breaking up moss and alga, and in food processing plants.

Stock #	Case Qty
232-8"	24
232-10"	24
432-20" Utility (not flow-thru)	12
332-Round	24

Medium Stiff Crimped Nylon Line

These brushes are flow-thru

Product Features—

Durable nylon fibre, popular in households and for less aggressive industrial applications. Excellent wet stiffness and flex fatigue. Inert to most strong acids and bases.

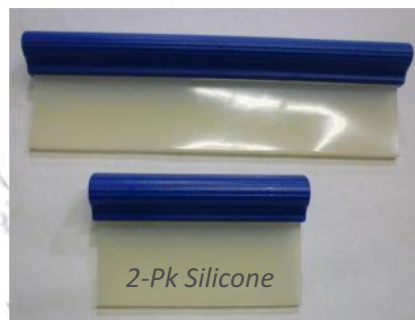

Shown is the 222N-8"

Stock #	Case Qty
222N-8"	24
222N-10"	24

18" Barn Broom

Handles

Product Features—

Different broom heads require different handles for optimal performance and efficiency.

The handle length should reach the users chin.

Choose a thicker handle, for more strength and durability.

Wooden Handles are often preferred for handling comfort and can be custom cut to size, offering great value. Wooden handles do not conduct electricity or cold and absorb shock. Order Tapered End Handles for Squeegees.
